GENERAL REGULATIONS

1. This tariff is subject to and governed by the present provisions of General Exchange Tariff PSCK NO. 3.

The provisions of General Exchange Tariff PSCK NO. 3 apply to this tariff except where in conflict with this tariff.

2. The schedules of monthly local exchange service rates applicable within the various exchange areas for the services offered therein are shown in Section 2 of this tariff. The services offered in each exchange area, the local service area for each exchange and the particular Rate Bands applicable thereto are specified in the portion of Section 3 applicable to such exchange area. (T)

3. EXCHANGE CLASSIFICATION

For the purpose of determining exchange service monthly rates, exchanges are classified by Rate Bands.

The Local Service Area (LSA) is the geographical area within which customers may make calls without the payment of toll charges. The charges for service within the LSA may be flat rated, measured usage rated, (time of day, distance and length of call) or any tariff approved combination of rate structures.

Issued: July 12, 2006

Effective: July 12, 2006

GENERAL REGULATIONS

5. LOCAL EXCHANGE SERVICE (T)

Local Exchange Service monthly rates and charges, included in Section 2 following, apply to exchange access lines only. Exchange access lines include the serving central office line equipment (including TouchTone capability) and all outside plant facilities including the Telephone Company provided and maintained network interface necessary to connect the serving central office to the customer premises. (T)

6. CHARGE TO CHANGE TYPE OF SERVICE FOR RESIDENCE SERVICE CUSTOMER

The types of local exchange service are Flat Rate and Measured Service.

- a. Within 90 days of the date of initiation of service, new residential subscribers shall be allowed a one-time change of their type of local exchange service without charge. This does not preclude the Company from charging for the original service connection, monthly and usage charges, for the period such service was used, or the addition or removal of any additional service(s). (See Note 1.) (T)
- b. Within 90 days of the date of a change in their type of service, existing residential subscribers shall be allowed to return to their prior type of local exchange service once without charge. This does not preclude the Company from charging for the previous service connection, monthly and usage charges for the period such service was used, or the addition or removal of any additional service(s). (See Note 1.) (T)

Note 1: The nonrecurring charge to change the type of service will only be waived once during a calendar year per subscriber.

Issued: July 12, 2006

Effective: July 12, 2006

D. Scott Ringo, Jr., Assistant Secretary, Cincinnati, Ohio

Section 1
1st Revised Page 4
Cancels Original Page 4

GENERAL REGULATIONS

7. MEASURED SERVICE

- a. Measured Service allows subscribers to control charges for monthly telephone service by controlling usage. Besides a monthly charge for the access line a subscriber is billed for usage that may vary depending upon the number, distance, duration, and time-of-day of calls originated. (T)
- b. Measured Service is furnished subject to the availability of facilities.
- c. The distance used for Measured Service billing is based on the airline mileage between rate centers serving the called and calling access line. The airline mileage is computed mathematically employing as a base a vertical (V) and a horizontal (H) coordinate for each central office, as determined from its latitude and longitude location using appropriate map projection equations.

Issued: July 12, 2006

Effective: July 12, 2006

D. Scott Ringo, Jr., Assistant Secretary, Cincinnati, Ohio

Section 1
Original Page 5

GENERAL REGULATIONS

7. Measured Service (Cont'd)

- d. The usage rates for originated customer Measured Service calls are: (See Note 1)

Measurement Tier	Peak Usage Rates		Off-Peak Usage Rates	
	Initial Min.	Add'l Min.	Initial Min.	Add'l Min.
1 (0 - 12 miles)	\$.03	.03	.03	.03
2 (13 - 26 miles)	.03	.03	.03	.03
3 (27 miles and over)	.03	.03	.03	.03

- e. The monthly charges for measured service are as listed in Section 2 of this tariff.
- f. The off-peak usage rates apply to that portion of the call occurring within the following periods:
- (1) From 9:00p.m. to but not including 8:00 a.m.. on Monday through Friday
 - (2) All day Saturday, Sunday and certain holidays. The holidays are New Years Day (January 1), Independence Day (July 4), Christmas Day (December 25); Labor Day and Thanksgiving Day (or their resulting legal holidays).

Note 1: The Operator Completion of Local Calls charge (See Section 30 of the General Exchange Tariff) applies in addition to the usage charges when the customer requests the assistance of the Telephone Company operator to complete a local call or a call to a cellular telephone service number that is not a toll call.

Issued: February 23, 1999

Effective: January 25, 1999

President, Cincinnati, Ohio

GENERAL REGULATIONS

7. Measured Service (Cont'd)

- g. Measured Service usage rates do not apply to Access Line Service for Customer Provided Public Telephone Service. (T)
- h. Customers may change to Measured Service from Flat Rate Service without the payment of the nonrecurring charge within 90 days after Measured Service becomes available in the central office. (T)
- i. A customer converting to Measured Service may change from Measured Service to any available type of access line service without having to pay the nonrecurring charge to establish such service provided the customer makes the change within 90 days from the time the customer changed to or purchased Measured Service. A customer may be exempted from the nonrecurring charges only once for a change to and only once for a change from Measured Service within a calendar year. (TI)
- j. Chargeable time includes the initial minute plus the additional minutes or fraction thereof, if any. When a call begins in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the call occurring within that rate period. In the event that a minute of use is split between two rate periods, the rate at the start of the minute applies. (T)

GENERAL REGULATIONS

8. GRANDFATHERED SERVICES

- a. Grandfathered services are available only for existing customers of that service. These services are not furnished for new installations, regrades, or moves unless exceptions are made in the tariffs for those services.
- b. The following services are grandfathered:
 1. (LAS) in Butler, Falmouth, Glencoe, Warsaw and Williamstown. This service may be eliminated once total LAS subscribership in these exchanges falls below 2000 lines. In the event that CBT chooses to eliminate LAS, CBT will file notification with the Commission prior to elimination of this service.
 2. Residence access lines without Touchtone. Customers with this service prior to January 25, 1999 will receive a \$0.75 credit for each applicable line so long as the customer does not move or otherwise change their local exchange service.
- c. A customer with a grandfathered service in paragraph b. preceding may change to an available service free of initial change charges.

GENERAL REGULATIONS

9. LOCAL USAGE DETAIL

- a. Local Usage Detail is an option for Measured Service customers who desire a printed listing of call details instead of summary billing of local usage.
- b. Requests for Local Usage Detail must be received prior to the billing date on which it is to be initiated.
- c. To establish Local Usage Detail, the initial charge to establish or change billing arrangements will apply as given in Section 2, paragraph B.2 of this tariff. The change of billing arrangement charge does not apply to (T) discontinue Local Usage Detail.
- d. The recurring charge for Local Usage Detail is included in the Monthly Rates for Measured Rate Individual (T)
Lines/Trunks with Call Detail as shown in Section 2, paragraph A of this tariff. (T)

GENERAL REGULATIONS

9. Hunting Service

- a. Hunting Service is the process by which two or more exchange service lines of the same class, served from the same central office and furnished to the same customer, are grouped so that incoming calls overflow to the first non-busy line if the called line is busy. A busy signal or busy report is not given unless all the grouped lines are busy.
- b. Hunting service may be set up on a serial, sequential or multiline group basis
- c. The rates for Hunting Service on individual lines are as follows:

	Monthly Rate	Nonrecurring Charge	
(1) Nonresidence Service, each line			
a. Flat Rate Line	\$ 9.50	\$8.50	(1)
b. Measured Rate Line	9.50	8.50	(1)
(2) Residence Service, each line	5.00	8.50	(1)

- d. Charges for Hunting Service on exchange access lines are applied as indicated herein and are in addition to the regular line rate. (See Note 1)

1. Nonresidence	12.25	12.25	
2. Residence	12.25	12.25	
c. To change from nonresidence exchange access line service to residence exchange access line service or vice-versa, per primary line			
1. Nonresidence	12.25	12.25	
2. Residence	12.25	12.25	
d. To change telephone number associated with Basic Local Exchange Service - Primary Line, per telephone number			
1. Nonresidence	12.25	12.25	
2. Residence	12.25	12.25	
e. To change billing arrangements associated with Basic Local Exchange Service - Primary Line, Noncomplex Accounts			
1. Nonresidence	12.25	12.25	
2. Residence	12.25	12.25	

Note 1: Rates for Basic Local Exchange Service - Primary Line are capped at the maximum rates shown in the table until July 12, 2011. These maximum rates are in accordance with the maximum rates for primary, single, voice grade lines defined in KRS 278.543. (House Bill No. 337, 2006 Regular Session) After July 12, 2011, Basic Local Exchange Service - Primary Line rates may increase above the maximum rates shown in the table, pursuant to the procedures to increase rates for primary, single, voice grade lines in KRS 278.543.

ISDN BASIC RATE INTERFACE SERVICE

A. GENERAL

1. ISDN Basic Rate Interface (BRI) Service is a digital local exchange service that provides a customer with the ability to transmit circuit switched voice, circuit switched data, and packet switched data simultaneously over a single access line. ISDN BRI Service is available from suitably equipped central offices and where suitable loop facilities exist.
2. ISDN BRI Service consists of a Basic Rate Access Line and ISDN Bearer Services. The Basic Rate Access Line and the ISDN Bearer Services are not offered separately. Up to three Bearer Services may be provisioned on each access line. In addition, optional features may be purchased as specified in B.3. following.
3. All circuit switched calls are carried on the public switched telephone network. Local circuit switched calling can be purchased as flat rate or measured rate service. All packet switched calls are carried by X.25 Packet.

B. SERVICE DESCRIPTION

1. Basic Rate Access Line
 - a. A Basic Rate Access Line is a digital line from the customer's location to the Telephone Company central office which transports one or more ISDN Bearer Services found in 2. following. A Basic Rate Access Line can carry up to two B-Channel Bearer Services and one D-Channel Bearer Service. All selected Bearer Services can operate on the Access Line simultaneously.

EXCHANGE RATE TARIFF
PSCK No. 2

CINCINNATI BELL TELEPHONE COMPANY

Section 4
Original Page 2

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

1. Basic Rate Access Line (Cont'd)

- b. Each terminal (voice or data set) that the customer places on a Basic Rate Access Line will be assigned a directory number. The customer must notify the Telephone Company of the number of terminals that will be used on each Basic Rate Access Line. A maximum of eight (8) terminals may be connected to a Basic Rate Access Line.

2. ISDN Bearer Services

ISDN Bearer Services define the types of traffic that the Basic Rate Access Line will carry. A Basic Rate Access Line can carry up to two B-Channel Bearer Services and one D-Channel Bearer Services simultaneously.

a. Circuit Switched B-Channel (Voice or Data)

A Circuit Switched B-Channel provides a 56 kbps or 64 kbps circuit switched service which can be used for either voice or data traffic. The call type (voice or data) can be changed on a call by call basis.

- (1) When multiple circuit switched terminals are connected to a Basic Rate Access Line with two Circuit Switched B-Channels, the user can specify how the terminals contend for use of the two B-Channels. Each B-Channel can be directly assigned for use by one terminal, or it can be available for use by multiple terminals.
- (2) Circuit Switched B-Channels may be purchased with either flat rate or measured rate service. Flat rate local calling is included in the flat rate B-Channel service option. Measured rate B-Channels will be billed for local usage via the rates and regulations in Section 1, paragraph 7 ("Measured Service"), of this tariff. Mixing flat rate and measured rate service between B-Channels on a single Basic Rate Access Line is prohibited. Mixing flat rate and measured rate service between Basic Rate Access Lines is prohibited when furnished on the same continuous property, except where the services are used for separate purposes, not used to supplement each other, and used for distinctly different applications.

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

2. ISDN Bearer Services (Cont'd)

a. Circuit Switched B-Channel (Voice or Data) (Cont'd)

(3) Circuit Switched B-Channels are provided with the following standard features:

- Call Hold - This feature allows the user to place a call on hold and retrieve it at a later time.
- Display Service - This feature provides terminals which are equipped with a display screen with the time and date, and the ability to inspect the status of calls in progress.
- Three Call References - Each circuit switched terminal will be offered the capacity to manage (hold, originate, terminate, or receive alerting) up to three calls at once. By placing an existing call on hold, the user can originate (or terminate) a second or third call.
- Call Transfer - This feature allows the user to transfer a call to another directory number. This feature is for use with voice calls only.
- Conference - This feature allows the user to add a third party to an existing conversation. This feature is for use with voice calls only.
- Call Drop - This feature allows the user to disconnect the last party added to a conference call.
- Calling Number Delivery - Displays the telephone number of the caller after the first ring.

CINCINNATI BELL TELEPHONE COMPANY

Section 4
Original Page 4

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

2. ISDN Bearer Services (Cont'd)

b. Packet Switched B-Channel

B-Channel Packet Service provides a 64 kbps connection to X.25 Packet.

- (1) Each B-Channel Packet terminal will be provided up to 24 logical channels. Each logical channel can carry an independent call with throughput of up to 19.2 kbps. If more than 24 logical channels are required, additional logical channels can be provided as found in 3.b.(3) following. Each logical channel may be established as one of the following types:
 - Two-way Switched Virtual Circuit (default)
 - One-way Incoming Switched Virtual Circuit
 - One-way Outgoing Switched Virtual Circuit
 - Permanent Virtual Circuit (additional charge)
- (2) The following features are provided to B-Channel Packet subscribers.
 - Fast Select Initiation
 - Reverse Charging Initiation
 - Flow Control Parameter Negotiation
 - Throughput Class Negotiation
 - Recognized Private Operating Agency (RPOA) Selection

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

2. ISDN Bearer Services (Cont'd)

c. Packet Switched D-Channel

This service provides a connection to X.25 Packet over the 16 kbps D-Channel.

- (1) Each D-Channel Packet terminal will be provided with up to 8 logical channels. Each logical channel can carry a packet call with throughput of up to 9.6 kbps. Additional logical channels can be provided as found in 3.b.(3) following. Each logical channel may be established as one of the following types:
 - Two-way Switched Virtual Circuit (default)
 - One-way Incoming Switched Virtual Circuit
 - One-way Outgoing Switched Virtual Circuit
 - Permanent Virtual Circuit (additional charge)
- (2) The standard features provided to D-Channel Packet subscribers are the same as those listed in b.(2) preceding.
- (3) The configuration choices available to D-Channel Packet subscribers are the same as those listed in b.(3) preceding.

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

3. Optional Features

The features in this section are available to ISDN BRI customers at additional cost. For Basic Rate Access Lines with multiple terminals and/or multiple directory numbers, the features must be purchased separately for each directory number on which the feature is desired. Features only function on call references assigned to the directory number subscribing to the feature.

a. Circuit Switched B-Channel Options

The following optional features are available for use on Circuit Switched B-Channels:

- (1) Hunting - This feature provides for a predefined search for an idle terminal to which a call can be completed. Terminals subscribing to hunting may not have multiple call references. Customers desiring Uniform Call Distribution (UCD) must first purchase hunting, and then purchase UCD from the General Exchange Tariff.
- (2) Additional Call References - This feature provides the customer with the ability to manage extra calls on an existing directory number. The customer may specify the number of call references desired for the directory number.
- (3) Six Party Conference Calling - This feature provides the ability to create a conference call with up to six parties. This feature is for use with voice calls only.
- (4) Call Pickup - This feature allows a user to answer any call within a customer defined call pickup group. This feature is for use with voice calls only.

B. SERVICE DESCRIPTION (Cont'd)

3. Optional Features (Cont'd)

a. Circuit Switched B-Channel Options (Cont'd)

- (5) Electronic Key Telephone Service (EKTS) - This feature provides a group of features that increases the user's voice terminal flexibility and offers the functionality of a key system to groups of users subscribing to EKTS.
- Shared Directory Numbers - This feature allows EKTS terminals to share one or more directory numbers (DNs). Originating and terminating calls on one terminal affect all terminals sharing that DN. The shared DNs can have multiple call appearances, multiple calls can exist on one DN, and more than one terminal sharing the DN can have a call active on that shared DN.
 - Bridging - When one EKTS user originates or receives a call on a shared directory number, bridging allows other terminals sharing that DN to bridge on to that active call.
 - Automatic Bridged Call Exclusion - This is a privacy feature that allows a customer to specify, on an EKTS group basis, that no other user can bridge on to calls. On a call by call basis, this feature can be disabled to allow bridging to occur.
 - Manual Bridged Call Exclusion - This is the opposite of Automatic Bridged Call Exclusion. On a call by call basis the user can restrict bridging.
 - Intercom Calling - This feature allows an EKTS user to call other terminals in the EKTS group with one or two digit dialing.

ISDN BASIC RATE INTERFACE SERVICE

B. SERVICE DESCRIPTION (Cont'd)

3. Optional Features (Cont'd)

a. Circuit Switched B-Channel Options (Cont'd)

(5) Electronic Key Telephone Service (EKTS) (Cont'd)

- Abbreviated Ringing and Delayed Ringing - Abbreviated and Delayed Ringing are related. When multiple terminals share a directory number, the customer can specify one or more of the terminals to receive Abbreviated Ringing and one or more of the terminals to receive Delayed Ringing. When a call attempts to terminate to the shared DN, the Abbreviated Ringing terminals will ring immediately. If the call remains unanswered after a pre-specified time, the Abbreviated Ringing Terminals will stop ringing and the Delayed Ringing terminals will begin ringing. The Delayed Ringing terminals will continue to ring until the call is answered or abandoned.

- (6) Additional Directory Number - This feature provides the customer with an extra call reference with a unique directory number. This feature is only available to EKTS subscribers.

b. Packet Switched Optional Features

The following features are available for use with Packet Switched B-Channel and D-Channel Bearer Services:

- (1) X.25 Hunting - This feature provides hunting between multiple directory numbers assigned to X.25 terminals.
- (2) Closed User Group (CUG) - This feature allows packet subscribers to form sub-networks within which members can communicate. The CUG is billed on a per member basis. Users can be members of more than one CUG. The CUG can be designed with the following configuration options:
- Incoming calls barred within the CUG
 - Outgoing calls barred within the CUG
 - CUG with incoming access
 - CUG with outgoing access

3. Optional Features (Cont'd)

b. Packet Switched Optional Features (Cont'd)

- (3) Additional Logical Channels - If logical channels are required in addition to those provided as standard in 2.b.(1) and 2.c.(1) preceding, they may be purchased in blocks of seven. The maximum number of logical channels allowed on a Packet Switched B-Channel is 127. The maximum number of logical channels allowed on a D-Channel is 15.
- (4) Permanent Virtual Circuit - This feature allows a call to be established over a dedicated logical channel to a prescribed address with no need for call setup or clearing.
- (5) Additional Directory Number - This feature provides an additional telephone number for a customer's packet switched bearer service.

C. REGULATIONS

- 1. ISDN BRI Service is furnished subject to the availability of suitable facilities and is only served from specially equipped digital central offices.
- 2. Temporary suspension of service is not available with ISDN BRI Service.
- 3. The minimum service period for ISDN BRI Service is one month

ISDN BASIC RATE INTERFACE SERVICE

C. REGULATIONS (Cont'd)

4. The customer must provide customer premises equipment that meets the technical requirements of the serving central office.
5. Customers must choose from a standard set of terminal button configurations when adding a terminal to a line. The charge for changing an existing terminal button configuration is listed in D.4.a. following. This charge is waived if the change is made as the result of adding a feature or service.
6. The customer is responsible for providing power to all customer premises equipment (CPE) attached to the ISDN Basic Rate Access Line.
7. The customer must notify the Telephone Company when terminals are added or removed from a Basic Rate Access Line. This is in order to maintain the proper provision of directory numbers and call control on the line.
8. An End User Common Line Charge (EUCLC) is applied to each Basic Rate Access Line.
9. One 911 charge is applied to each Circuit Switched B-Channel.
10. When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.
11. Service from some central offices may not provide all of the features and functionality described in this tariff.

TRUNK ADVANTAGE^R

A. GENERAL

1. TRUNK Advantage^R provides exchange access service at a 1.544 Mbps (DS-1) interface.
2. TRUNK Advantage^R Service consists of a DS-1 Digital Trunk Facility and up to twenty-four (24) 64 kbps Digital Trunk Channels. Digital Trunk Facilities and Digital Trunk Channels are not offered separately.
3. Three types of Digital Trunk Channels are available. Standard channels provide the same features as analog trunk lines found in Section 2 preceding. DID channels provide direct inward dialing service as found in Section 15 of the General Exchange Tariff. Two-Way/DID channels provide capability for two way standard service and direct inward dialing service.
4. Trunk channels may be purchased with flat or measured rate service. Measured rate service regulations and rates are listed in Section 1, paragraph 7 of this tariff.
5. All Digital Trunk Channels use MF or DTMF signaling.

B. REGULATIONS

1. DID channels do not require a DID termination as listed in the General Exchange Tariff Section 15 paragraph B.4.(b)4. DID trunks do require that groups of numbers be purchased from paragraph C. of this section.
2. TRUNK Advantage^R is offered under the Variable Term Payment Plan (VTPP). The VTPP rates are payable over a period selected by the customer from those available. Conditions and regulations pertaining to the VTPP are included in Section 34 of the General Exchange Tariff.
3. The minimum period of service for TRUNK Advantage^R is 12 months.
4. Termination Charges
 - a. Trunk Advantage^R is available for a minimum term of 12 months or under a term payment plan of 12, 24, 36 or 60 months. If a Customer terminates service, without cause, prior to the expiration of the minimum 12-month period or applicable term payment plan period, the Customer will pay to CBT a termination charge equal to all remaining amounts due or to become due, including but not limited to all monthly charges for which Customer would have been responsible if the Customer had not terminated prior to the end of the applicable 12, 24, 36 or 60-month period.
 - b. If Customer removes one or more facility (facilities) or channel(s) from service prior to the expiration of the term hereof, Customer will pay to CBT a termination charge equal to all monthly charges for such facility (facilities) or channel(s) for which Customer would have been responsible had Customer not removed such facility (facilities) or channel(s). (C)
 - c. If nonrecurring charges associated with the installation of a Trunk Advantage^R Service are waived and the service is then terminated prior to completion of the 12-month minimum service period or the VTPP contract period, the customer will become liable for payment of the waived charges. (C)

5. Upgrades

Customers wishing to upgrade existing trunk service to TRUNK Advantage^R will be charged the listed nonrecurring charges for the appropriate number of Digital Trunk Facilities and will have to convert to the DID rate structure in Paragraph C of this section. Non-recurring charges on Digital Trunk Channels are waived for the existing trunks that are moved to TRUNK Advantage^R. Any new channels added at the time of conversion to TRUNK Advantage^R will receive non-recurring charges.

6. TRUNK Advantage^R Measured Service provides customers with the option to be billed for usage determined by the number, distance, duration, and time-of-day of originated calls. Mixing measured and flat rated service on the same continuous property is prohibited, except where the two services are used for separate purposes and are not used to supplement each other.

- a. A TRUNK Advantage^R Measured Service Customer would purchase B-Channel Circuits from paragraph C. of this Section and would be charged measured rates from Section 1, paragraph 7 preceding.

C. OPTIONAL FEATURES

1. Integrated Advantage Service

Integrated Advantage Service provides exchange access and special access through a 1.544 Mbps interface. Integrated Advantage is available in two versions. The first version consists of a DS1 facility and up to twenty-four 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 10, 2006 at least 2 of the channels must be used for digital data service. The remaining channels can be used in any combination.

(C)
|
(C)

The second version of Integrated Advantage Service consists of a DS1 facility (Lite) and up to twelve 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 10, 2006 at least 1 of the channels must be used for digital data service. The remaining channels can be used in any combination.

(C)
|
(C)

A special educational rate for the Lite version of the Integrated Advantage Service is available to municipal, county, and state public schools and to parochial and private schools.

Flat Rated Channels and Measured Rate channels are available for Digital Trunk Channels.

Regulations for Integrated Advantage Service are the same as those described in Section B above.

Rates for Integrated Advantage Service are shown in Section D.2 below.

Regulations and Rates for Digital Data Service, Voice Grade Service, and Frame Relay Service are found in Cincinnati Bell Telephone Tariff FCC No. 35 Section 7.

2. Channel Transfer Service

This feature allows the customer to transfer an incoming call to another line and then hang up, leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call.

This feature is for digital channels only and is not intended for Integrated Advantage channels used to transport analog, local exchange service.

Material formerly found on this page can be found on page 4.

EXCHANGE RATE TARIFF
PSCK No. 2

CINCINNATI BELL TELEPHONE COMPANY

Section 6
Original Page 1

PRIME Advantage[®]

A. GENERAL

1. PRIME Advantage[®] is an ISDN local exchange service that provides a customer with the ability to transmit and receive multiple voice and data circuit switched calls simultaneously over a single Primary Rate Facility. PRIME Advantage[®] is available from suitably equipped central offices and where suitable loop facilities exist.
2. PRIME Advantage[®] consists of a Primary Rate Facility and B-Channel Bearer Trunks and D-Channel Bearer Services. The Primary Rate Facility and the ISDN Bearer Trunks are not offered separately. Up to twenty-three B-Channels Bearer Trunks and one D-Channel Bearer Service may be provisioned on each access line. In addition, optional features may be purchased as specified in B.5. following.
3. Three types of B-Channel Bearer Trunk Channels are available.
 - Standard channels provide the same features as analog trunk lines found in Section 2 preceding.
 - DID channels provide direct inward dialing service as found in Section 15 of the General Exchange Tariff.
 - Two-Way/DID channels provide capability for Two-Way Standard Service and Direct Inward Dialing Service.
4. Trunk channels may be purchased with either flat or measured rate service. Measured rate service regulations and rates are listed in Section 1, paragraph 7, preceding.

B. SERVICE DESCRIPTION

1. Primary Rate Facility

A Primary Rate Facility is a digital pipe from the customer's location to the Telephone Company central office which transports one or more ISDN Bearer Trunks found in 2. following. A Primary Rate Facility can carry up to twenty-three 64 Kbps B-Channel Bearer Trunks and one 64 Kbps D-Channel Bearer Service. All selected Bearer Trunks and Services can operate on the Primary Rate Facility simultaneously.

EXCHANGE RATE TARIFF
PSCK No. 2

CINCINNATI BELL TELEPHONE COMPANY

Section 6
Original Page 2

PRIME Advantage[®]

B. Service Description (Cont'd)

2. B- Channel Bearer Trunks

B-Channel Bearer Trunks define the types of traffic that the Primary Rate Facility will carry. A B-Channel Bearer Trunk is a 64 Kbps information channel used in conjunction with circuit-switched service. These Trunks can be configured as 1-Way In, 1-Way Out, or 2-Way.

3. D-Channel Bearer Services

The D-Channel Bearer Service is a 64 Kbps signalling channel used to control associated B-Channels. One D-Channel is required for each Primary Rate Facility, and is included in the Primary Rate Facility's monthly rate.

4. PRIME Advantage[®] - Standard Features

- a. PRIME Advantage[®] will provide transport of customer information over the 23 available B channels in the form of circuit-switched voice or data at speeds up to 64 Kbps. The basic service will include the 1.544 Mbps switched facility and the D-Channel Bearer Service. B-Channels will be ordered in addition to the Primary Rate Facility.
- b. Dedicated B-Channel configuration - Dedicated trunk groups are the standard feature for PRIME Advantage[®]. Dedicated trunk groups must be assigned to handle one specific call type (ex: DID, DOD).
- c. D-Channel configuration - Each Basic PRI service will include a dedicated D-Channel for signaling.

B. SERVICE DESCRIPTION (Continued)

5. PRIME Advantagesm - Optional Features

The features in this section are available to customers at additional cost.

- a. Integrated PRIME Advantagesm Service - Integrated PRIME Advantagesm Service provides exchange access and special access through a 1.544 Mbps interface. Integrated Prime Advantage consists of a DS1 facility and up to twenty-four 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service (ISDN PRI), Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. As of March 10, 2006 at least 2 of the channels must be used for digital data service. The remaining channels can be used in any combination. Flat Rated Channels and Measured Rate channels are available for ISDN PRI B-Channels. (C)
- b. Call-By-Call Service Selection - This features provides the option for B-Channels to be assigned into a flexible trunk group which can support different call types based on real-time traffic needs. Call-By-Call service selection also allows primary as well as secondary long-distance carriers to be established for the entire trunk group (i.e., Alternate Routing Arrangement). (C)
- c. Individual Calling Line Identification (ICLID) - This feature provides customer access to the calling party's number. Feature operation is dependent on customer premise equipment and technology in use at the calling party's serving office. (Similar to the Caller ID feature available on access lines.)
- d. Direct Inward Dialing (DID) - This feature provides Direct Inward Dialing to a station. DID Termination rates will apply per B-Channels configured with this option. PRIME Advantagesm DID Number Blocks are ordered with DID Terminations on the B-Channels.
- e. Back-up D-Channel - This feature provides a minimum of three or more PRIME Advantagesm facilities terminating at the same customer premise to share one primary and one secondary (or Back-up) D-Channel. The number of PRIME Advantagesm facilities that can be shared by this feature will be based upon the availability of central office and other network facilities, and will be subject to change on a central office by central office basis.
- f. Channel Transfer Service - This feature allows the customer to transfer an incoming call to another line, leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call.

This feature is for digital channels only and is not intended for Integrated Prime Advantage channels used to transport analog, local exchange service.

PRIME Advantage[®]

C. REGULATIONS

1. PRIME Advantage[®] is furnished subject to the availability of suitable facilities and is only served from specially equipped digital central offices.
2. PRIME Advantage[®] is offered under the Variable Term Payment Plan (VTPP). The VTPP rates are payable over a period selected by the customer from those available. Conditions and regulations pertaining to the VTPP are included in Section 34 of the General Exchange Tariff.
3. Temporary suspension of service is not available with PRIME Advantage[®].
4. The minimum service period for PRIME Advantage[®] is twelve months
5. The customer must provide customer premises equipment that meets the technical requirements of the serving central office.
6. The customer is responsible for providing power to all customer premises equipment (CPE) attached to the Primary Rate Facility.
7. The customer must notify the Telephone Company when call type maximums and minimums are to be changed for the call-by-call feature. This is in order to maintain the proper provision of directory numbers and call control on the line.
8. An End User Common Line Charge (EUCLC) based on maximum of 5 multi-line nonresidence subscriber EUCLC applies to each Primary Rate Facility.
9. One 911 charge is applied to each outgoing and 2-way B-Channel Bearer Trunk (per channel).
10. When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.

PRIME ADVANTAGEsm

C. REGULATIONS (Continued)

11. Service from some central offices may not provide all of the features and functionality described in this tariff.

12. Termination Charges

- a. Prime Advantage^R is available for a minimum term of 12 months or under a term payment plan of 12, 24, 36 or 60 months. If a Customer terminates service, without cause, prior to the expiration of the minimum 12-month period or applicable term payment plan period, the Customer will pay to CBT a termination charge equal to all remaining amounts due or to become due, including but not limited to all monthly charges for which Customer would have been responsible if the Customer had not terminated prior to the end of the applicable 12, 24, 36 or 60-month period.
- b. If Customer removes one or more facility (facilities) or channel(s) from service prior to the expiration of the term hereof, Customer will pay to CBT a termination charge equal to all monthly charges for such facility (facilities) or channel(s) for which Customer would have been responsible had Customer not removed such facility (facilities) or channel(s). (C)
- c. If nonrecurring charges associated with the installation of a Prime Advantage^R Service are waived and the service is then terminated prior to completion of the 12-month minimum service period or the VTPP contract period, the customer will become liable for payment of the waived charges. (C)

13. Upgrades

Customers wishing to upgrade existing analog trunk service to PRIME Advantage^R will be charged the listed initial charges for the appropriate number of Primary Rate Facilities and will have to convert to the DID rate structure in Paragraph D of this section. Initial charges on B-Channel Bearer Trunk Channels are waived for the existing analog trunks that are moved to PRIME Advantage^R. Any new channels added at the time of conversion to PRIME Advantage^R will incur initial charges. Customers under contract for TRUNK Advantage^R can upgrade to PRIME Advantage^R and will not be charged any TRUNK Advantage^R termination charges.
